**Subject:** Westlake Landfill Isolation Barrier Construction (UNCLASSIFIED)

Dan, I didn't get a chance to talk with you following the CAG meeting. Kudos to your team for not getting pulled into an emotional driven debate. I believe Robyn provided you with her trip-report meeting minutes. Certainly, we are prepared to discuss the events and alternatives prior to the December CAG.

On another note we have received a request (below) from a contractor related to the IB construction. This is most likely the first of many such e-mails that USACE will receive from the construction community.

We can address this in two ways: (1) direct all such requests to you (or one of your staff) or (2) respond by stating that no contract will be administered by either the Corps or EPA as the PRP is required to take the lead on investigative, design and construction activities. Just let either me or Robyn know what direction you wish.

Have a great weekend - Scott

**Subject:** [EXTERNAL] Westlake Landfill Isolation Barrier Construction

Hello Marvene:

I wanted to find out from you when RFQ's & RFP's will be accepted for this upcoming project? We have been following the Bridgeton & Westlake Landfill projects are very interested in performing this remediation work. Do you know who will be handling the procurement and who a contact would be? We want to make sure that we are pre-qualified to bid on this work when requested. I've enclosed an electronic copy of our Company Brochure for your review and information. For your information, I will be exhibiting at the upcoming Midwest Levees and Rivers Conference in St. Louis, MO from 10/27-10/29. Please stop by and visit with me if you are there. We will be sharing our geotechnical construction capabilities here, which include Isolation Barriers, Slurry Walls, PRB Walls, Cut-Off Walls, Soils Stabilization, etc. We complete a lot of slurry wall work for the Army Corp.

Feel free to contact me anytime at 719-331-9306. We look forward to hearing from you soon.
